

Alternate Strategies for Managing Your Nonprofit's Finances *A Webinar Exclusively for Executive Directors*

Don't miss our complimentary webinar, "**Alternate Strategies for Managing Your Nonprofit's Finances,**" on Tuesdays, March 17 and May 19, 2009 at 2:00 PM MDT. The seminar is specifically designed for chief executives of growing small- to mid-size nonprofit organizations who seek affordable and workable solutions to their financial management issues.

The webinar will address the following questions:

- As the executive head of a nonprofit organization, what is my stewardship responsibility for financial management and what should I know?
- What are fiscal management best practices and why are they important?
- Why do conventional financial management organizational strategies fall short?
- What is an alternate technology-enabled strategy that combines in-house and external resources?
- How do I evaluate and select a strategy that is right for my organization?

The webinar represents the first opportunity to preview our newly expanded portfolio of services to nonprofit organizations. While our previous focus was to provide in-house accounting software, notably **Sage MIP Fund Accounting**, we have designed a more comprehensive and collaborative approach, combining expert external services, training and software tools to implement best practices and achieve financial management success.

The webinar utilizes on-line meeting software free teleconferencing. It is scheduled to last for one hour. Each attendee will receive a supporting information packet.

Click here to register. Contact Lee Bengston 303-367-1058, or Lee@asisucceednps.com, if you have any questions.

Since the webinar will be presented from a CEO's perspective, it would not be useful for the financial functional manager (controller, finance director, business manager, etc.) to attend in your place. However, we welcome your financial manager to attend with you.
